INTERNATIONAL SYMPOSIUM IN NEUROLOGY

Enra Mehmedika Suljić (Sarajevo, BiH)

Aida Šehić Kantardžić (Louisville, KY, USA)

Nevena Mahmutbegović (Sarajevo, BiH)

BRIEF DESCRIPTION, INCLUDING INTENDED AUDIENCE:

The main topic of this year's symposium is "Biomarkers in Neurology." Progress in the research of biological markers is revolutionizing the diagnosis and monitoring of neurological diseases. The symposium will gather leading experts who will analyze, through lectures and discussions, the role of biomarkers in early diagnosis, personalized treatment, and monitoring therapy outcomes in neurology. The symposium is intended for neurology specialists, young neurologists, neuroradiologists, neurosurgeons, residents and students.

08:00 - 08:45 Registration

08:45 / 09:00 Welcome message: Enra Mehmedika Suljić (Department of Neurology, Clinical Center of the University of Sarajevo, Bosnia and Herzegovina)

Prof dr. Huban Atila, TOA

Dr. Melita Adilović Čabric, YO-BHAAAS

BRIEF DESCRIPTION, INCLUDING INTENDED AUDIENCE:

This year's Fifth International Ophthalmology Symposium focuses on the cornea, refractive surgery, and the ocular surface, especially on the integrative and comprehensive approach to treating patients. The symposium will include lectures by renowned speakers from Italy, Turkey, Ireland, Switzerland, Norway, BiH, Croatia, North Macedonia, Montenegro, and Germany. The symposium will be organized in conjunction with the Turkish Ophthalmology Association (TOA) and their Cornea and Refractive Surgery Section, which is the continuation of their regional expert meeting and a platform for future collaboration with TOA and the Balkan ophthalmic community. Morning Young Ophthalmology sessions will be reserved for young ophthalmologists (YO) with a panel and discussion (free topics) led by inspirational, emerging YO from BiH, the Region, and Turkey. A hands-on workshop on Topography-Tomography readings and a quiz for residents and YO. Will be organized in two sessions, first with basics in topography and tomography with special emphasis on the diagnosis of ectatic corneal diseases. The goal will be to provide practical insights for residents and young ophthalmologists, and will include illustrative cases to complement the quiz session and hands-on references related to the CSO Sirius and Heidelberg anterior segment devices. The second part about premium IOLs management (toric and multifocal IOLs). Workshop participation will be certified, as well as the symposium attendance with CME credits.
