PROGRAM

Dear friends and members of the Bosnian-Herzegovinian American Academy of Arts and Sciences,

Welcome to the 13th Days of BHAAAS in Bosnia and Herzegovina!

We have worked tirelessly for a year to bring you this impressive conference – the largest scientific event in the history of Bosnia and Herzegovina – and the time has finally arrived. All the hard work is about to pay off as we finally have the privilege to host this extraordinary gathering of hundreds of world-class experts here in Sarajevo.

Here are just some of the numbers: 16 members of the Organizing Committee coordinated with over 70 symposia chairs to put on 32 symposia in medical, technical, natural, and social sciences, sustainability, and humanities and the arts. Over 350 presentations are taking place at 4 locations over 4 days, delivered by experts from 26 countries. We are running 16 special events, workshops, and round table discussions, many of them of general interest and open to the public. We also have a special program devoted to students, as well as 4 interdisciplinary symposia and accompanying events dedicated to sustainability, the main theme of the conference. Rounding out the scientific program are several cultural events, including exhibits, book promotions, and a grand opening ceremony at Sarajevo's City Hall.

This conference was only possible because of the generosity and commitment of many people, most of all the Organizing Committee and the network of symposia chairs, editors, and reviewers who donated their time and expertise to BHAAAS and its Days. Of course, none of this would ultimately come to fruition without the financial support of our partner organizations and sponsors. We are deeply grateful that you have recognized the value and the transformative power of the work BHAAAS does.

We hope you will enjoy these four days of science and arts ahead of us. We also hope you will share your knowledge, learn something new, network, and make new friends. By doing this, we can demonstrate what true progress and real innovation looks like. Together, we can send the message that a future based on knowledge and exchange of ideas is the only way forward.

On behalf of the Organizing Committee,

Ismar Volić
BHAAS President
